

Augusta Township Public Library Wireless Access Policy

To fulfill its mission of providing access to information of all types in a wide range of formats, the Augusta Township Public Library provides free wireless access within the Library's premises. Personal laptops and other mobile Internet devices can be used to gain connectivity to the Library's wireless network without a network jack.

The Library's wireless access point, also known as a WiFi hot spot, provides an unsecured connection to the Internet. Wireless access is available during the Library's regular hours of operation.

All wireless users are expected to act in a lawful and respectful manner. By connecting to the Library wireless network, users are required to conform to the conditions outlined in the Augusta Township Public Library's **Computer and Internet Access Policy**.

Most WiFi equipment will be compatible with the Library's wireless access point; however the Library can make no guarantees as to compatibility.

Use of the Library's wireless network is entirely at the user's own risk. Augusta Township Public Library will not be responsible for any compromised information or loss through use of its wireless access. This includes, but is not limited to:

- Electrical surges
- Disruptions to wireless service
- Loss or theft of the wireless device

Additional Guidelines:

As the Library's wireless network is not secure, information sent to or from laptops or other mobile Internet devices, can potentially be captured by someone else.

It is the users responsibility to protect their device from viruses and hackers (e.g. by up-to-date anti-virus software, firewalls, etc.)

The Library recommends that credit card, online banking information, and passwords NOT be transmitted while using the wireless network

The Library assumes no responsibility for the safety of equipment or for laptop configurations, security, or data files resulting from the connection to the Augusta Township Public Library wireless network.

Printers are not available on the wireless network. To print, patrons must save the file to an external storage device, and then print from one of the Library's computer workstations.

Direct access to our staff mail server is not available. In order to send and receive email via the wireless connection, patrons will need to use a web-based mail service (such as Hotmail, Yahoo!, Gmail, etc.), or a client-based service connected to their Internet Service Provider.

To use the Augusta Township Public Library's wireless Internet connection, patrons will need their own laptop or other device equipped with wireless network interface hardware. If you plan to use audio files, you will also need your own headphones.

Please Note:

The Library cannot provide extensive technical assistance with regard to your laptop or other computing device. The Library cannot accept the liability of handling your equipment. The Library will not be held responsible for any damages sustained while using your laptop/wireless device within the Library's premises or while using the Library's wireless network.
